PROFILE SUMMARY

Full Stack Engineer with 4+ years of experience specializing in Node.js, Express.js microservices, and React/Next.js frontends for high-throughput fintech products. Proven expertise in building secure OTP/TOTP authentication services, multi-step KYC verification flows for major banking partners (IPPB, Kotak, NSDL, CSC), and real-time notification platforms. Experienced in cloud-native deployments on GCP with Docker, Kubernetes, and Jenkins CI/CD, as well as distributed data architectures (MongoDB, PostgreSQL, Cassandra, Redis). Recognized as Batch Topper in React/Next.js training and 2x Employee of the Month.

SKILLS

Languages & Frameworks:	JavaScript (ES6+) · TypeScript · Node.js · Express.js · React.js · Next.js · gRPC · REST APIs · Microservices · WebSockets/Socket.io
Databases:	MongoDB · Apache Cassandra · PostgreSQL · AWS DynamoDB · Redis
Cloud & DevOps:	GCP · AWS (Lambda, EC2, S3) · Firebase · Docker · Kubernetes · Jenkins · GitHub Actions · GCP Pub/Sub
Testing:	Jest · Jest-Cucumber
Authentication:	SSO (Auth0) · OAuth 2.0 · OpenID Connect · JWT
AI-Assisted Development:	GitHub Copilot · Codex · Antigravity (code review & productivity)
Automation & Tools:	n8n · Obsidian · Git · Tailwind CSS · Material UI · Video.js · Novu
Professional Skills:	System Design · Agile/Scrum · Team Collaboration · Problem Solving · Time Management

WORK EXPERIENCE

Software Engineer - II June 2023 – Aug 2026

iServeu Technology, Bhubaneswar, Odisha, IN

- Backend Architecture:** Design and deploy scalable backend microservices in Node.js/Express.js with REST APIs on GCP using Docker and Kubernetes, serving high-volume banking transaction workflows peaking at 2,500+ TPS (transactions per second).
- Frontend Ownership:** Built 2 greenfield React.js/TypeScript applications from scratch and contributed to high-traffic merchant dashboards serving 300K+ users per banking partner alongside admin onboarding portals for 500+ internal users.
- KYC & Onboarding Orchestration:** Built end-to-end KYC verification state machines (Aadhaar, PAN, biometric, liveness) for 4 partner integrations — IPPB, Kotak, NSDL, CSC — using MongoDB for high-throughput session storage and PostgreSQL for audit compliance.
- Authentication & Security:** Designed high-availability RBI-compliant OTP and TOTP (RFC 6238) 2FA authentication microservices; replaced Cassandra state-storage with stateless HMAC tokens to eliminate database I/O and reduce auth latency by ~60%.
- Notification Infrastructure:** Built a centralized Notification Dashboard integrating Novu SDK and GCP Pub/Sub to manage multi-channel alerts (SMS, email, push), cutting manual engineering template updates by ~40%.
- Device Management:** Developed mATM device mapping REST APIs for banking correspondents, using MongoDB to track and map hierarchy for 5,000+ active mATM devices alongside Firebase for real-time status alerts.

- **DevOps & Quality:** Managed CI/CD pipelines via Jenkins/Docker; authored comprehensive unit/integration test suites using Jest and Jest-Cucumber; mentored a team of 4 junior engineers on best practices.

Key Recognition: Awarded **Batch Topper** in iServeu's React/Next.js Training Program for building a full-featured server-side rendered application.

MERN Stack Developer

July 2022 – May 2023

MAGTAPP Technology, Bhubaneswar, Odisha, IN

- Developed responsive web UIs using React.js, Next.js, Tailwind CSS, and Material UI; built backend REST & gRPC microservice APIs in Node.js and Express.js.
- Utilized AWS Lambda, EC2, S3, and DynamoDB for cloud file storage and high-availability ad-serving workflows on M Plus platform.
- Conducted peer code reviews and debugged production issues to maintain application uptime and performance.

Key Recognition: Awarded **Employee of the Month** twice (January 2023 & February 2023) for outstanding productivity and delivery.

Operation Executive – Trainee

February 2022 – July 2022

INFOSYS Limited, Mysore, Karnataka, IN

- Completed Java 11 & Spring Boot training; built Ekart e-commerce software for customer/product data management.

FEATURED PROJECTS

SDLC Automation Pipeline (n8n, Obsidian, Jenkins, Jira API)

Ongoing

- Self-initiated workflow automation connecting Jira ticket updates directly to Jenkins builds, automated health-check verifications, and QA documentation handoffs.

Enterprise Node.js Boilerplate

- Production-ready layered microservice boilerplate featuring generic multi-database repositories (MongoDB, PostgreSQL, Cassandra) and a strict schema-driven validation engine. (github.com/Kuldeep-Pradhan/nodejs-boilerplate)

Stateless TOTP Authentication Service

- Horizontally scalable microservice utilizing HMAC-SHA256 client-held tokens to eliminate server state. Implemented strict expiry enforcement and timing-safe cryptographic comparisons. (github.com/Kuldeep-Pradhan/totp_service)

EDUCATION & CERTIFICATIONS

B.Sc, Information Technology Management

07/2016 – 10/2020

Ravenshaw University, Cuttack, Odisha

- **iServeu In-House React & Next.js Training:** Batch Topper (Top Score in Cohort)
- **Udemy Certification:** Spring Boot & Java Full Stack Development
